Live In Care

Bespoke Live In Care

Live In care provides high quality care and support in your own home; an alternative to residential and nursing care homes. It allows independence within your own home. Live In care involves personal carers living in a client's home.

Bespoke Live In care package

A care needs assessment is undertaken prior to a package being delivered which includes risk assessments of the home, environment and customer. A person centred care plan is then drawn up with you the customer around your needs and wishes. Our Live In carers are experienced in care and will undertake specialist training as and when necessary.

Short-term and respite Live In care

There are many reasons this may be the perfect solution for you or a loved one; offering recovery in your own home following an operation, a chance for the main carer to have a well-deserved break, provide an opportunity to trial Live In care whilst deciding on future care options and prevent admission to a care home.

“Manorcourt Homecare have been brilliant. Always available if we had any concerns regarding mum. I can honestly say that my mum’s carer has given my mum a quality of life. Regularly reviewed my mum’s care plan to ensure that it was appropriate as her condition changed. I would recommend Manorcourt Homecare to anyone who needs live in care.”

“We have been assigned two fabulous carers. We cannot fault any aspect of their care. They are compassionate, kind, highly experienced and professional. We have further been supported by other carers. They have gone above and beyond in accommodating our wishes in providing consistent care for our parents.
